ABOUT

LIMELIGHT INTERIORS is a kochi based design studio headed by Mr. Alfred jijo. Our identity comes from our ability to understand our clients. Our interests in design is reflected in our varied palette of retail spaces, restaurants and residential projects. Be it a budgeted project or premium ones we do Interiors, Exteriors and Landscaping and automations. Our materials are tested to suit the drastic climatic variations in the region.

OUR VISION

Creating the most efficient layout to make the most of a room's potential in terms of use and aesthetics while taking into account the characteristics of the space and the style desired.

OUR MISSION

Our mission is to become #1 interiors in india with Value for money that combine functionality with high quality and innovation for our customers.

INTERIOR

Interior design is the science of understanding behaviors to help property owners create a functional room within a building, including the shapes of a room's walls, floors, and more.

ARCHITECTURE

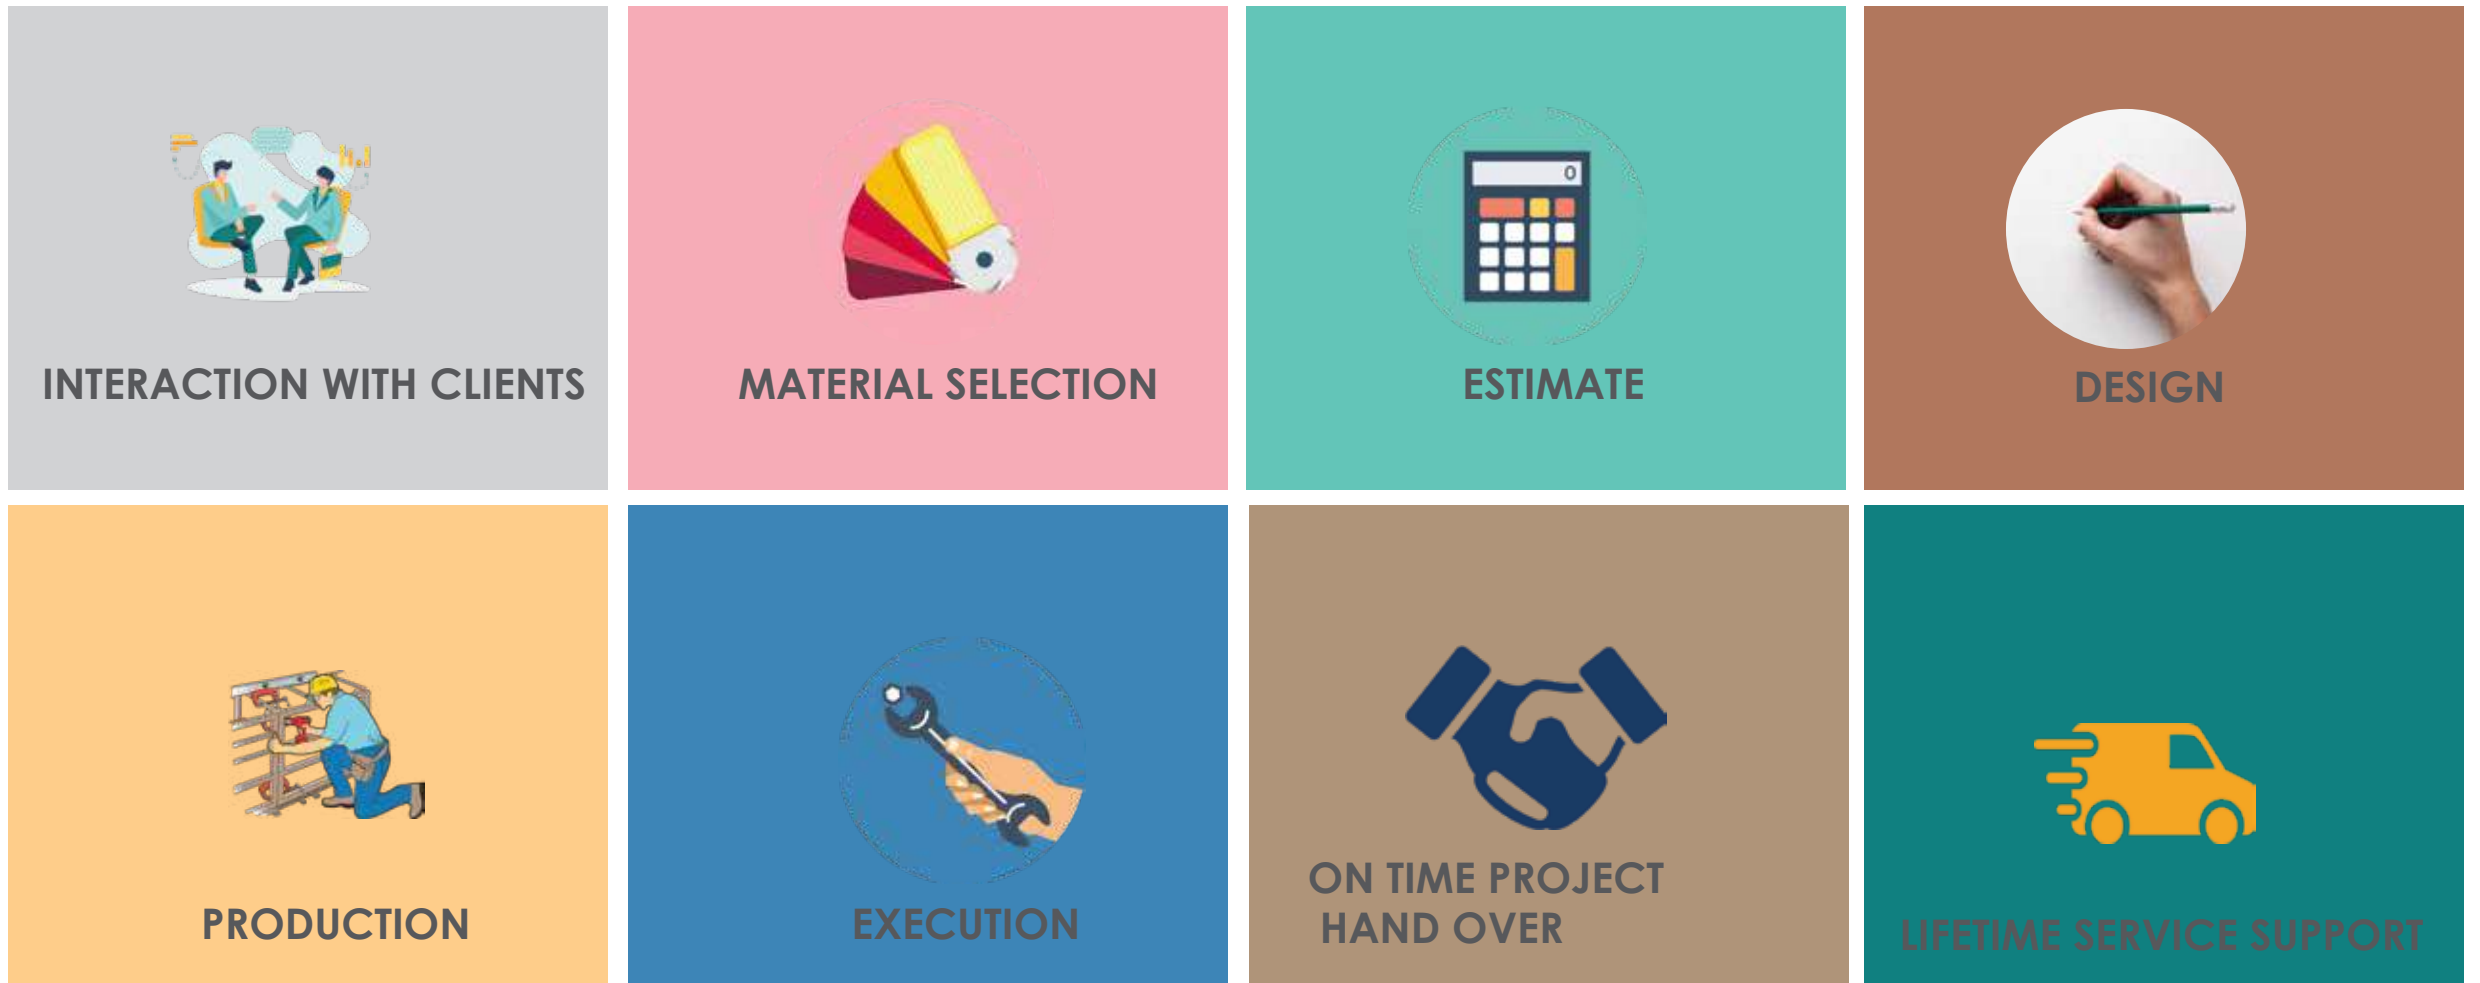

The infinite variety of these spaces can be as varied as life itself and they must be as sensible as nature in deriving from a main idea and flowering into a beautiful entity.

AUTOMATIONS

A home automation system will monitor and/or control home attributes such as lighting, climate, entertainment systems, and appliances. It may also include home security such as access control and alarm systems.

PROCESS

1 INTERACTION WITH CLIENTS

Social interaction is the process by which we act and react to those around us. In a nutshell, social interaction includes those acts people perform toward each other and the responses they give in return.

2 MATERIAL SELECTION

Material selection is the act of choosing the material best suited to achieve the requirements of a given application.

3 ESTIMATE

a statement of the cost of work to be done. To find a value that is close enough to the right answer, usually with some thought or calculation involved

4 DESIGN

a plan or drawing produced to show the look and function or workings of a building, garment, or other object before it is made.

5 PRODUCTION

Production is similar to manufacturing but broader in scope. It refers to the processes and techniques that are used to convert raw materials or semi-finished goods into finished products or services with or without the use of machinery.

6 EXECUTION

The carrying out of a plan, order, or course of action.

7 ON TIME PROJECT HANDOVER

Where your work comes to fruition. But handover is more of a process than a milestone, so there is a lot to get right.

8 LIFETIME SERVICE SUPPORT

The lifetime of a product has two definitions: the span of time that the item is safe to use and, secondly, the span of time that the product is in production and warranted.
